

Personal Job of Interest and Educational Path

In this assignment, you will prepare a report on a career of interest to you at this time. It might well change! However, for the present purpose, choose an area of interest then outline the necessary educational path you would need to take to reach that career goal. Begin with grade 11, include possible work experience and required skills, then complete with full information on the post-secondary institution: admission requirements, length of program, types of courses, tuition, cost of books, and final outcome: diploma, certificate, or degree. Include information on job futures and likely salary for the position you have chosen.

Write your report in your own words and cite all sources consulted. Your work should be typed single-paced under specific sections:

- Introduction
- Career goal - job description, job futures, salary
- Grade 11/12 required courses
- Required skills, experience, references, portfolio, etc.
- Post-secondary institution
- Conclusion

You will also be expected to give a presentation on your personal job of interest. The goal of your presentation is to address all of the topics that will be included in your report, and to dress as if you were already in your chosen career! The presentation should be 3-5 minutes long.
